

# Biotechnology Explorer Kits

**pGLO Bacterial Transformation Kit**  
Insert jellyfish DNA into bacteria. Express green fluorescent protein (GFP)!

**GFP Purification Kit**  
Capture the glow. Purify genetically engineered jellyfish protein from bacterial

**DNA Fingerprinting Kit**  
DNA evidence. Talk about it. Work with it.

**Chromosome 8 PCR Kit**  
Experience the thrill. Fingerprint your own DNA.

**Protein Fingerprinting Kit**  
Explore evolution. Use molecular evidence.

**Analysis of Precut Lambda DNA Kit**  
Give them the basics. DNA electrophoresis.

**Restriction and Analysis of Lambda DNA Kit**  
Talk about molecular scissors. Then use them.

**Size Exclusion Chromatography Kit**  
Watch it flow. The science of biomolecule separation.

**Secrets of the Rain Forest Kit**  
Apply biotechnology. Take a protein drug to market.

**Plasmid and Genomic DNA Purification Kits**  
Take the next step. Isolate that plasmid DNA.

**And much, much more...**

**See the link on the main page to order the Planet Science Special Offer and receive a pGlo Bacterial Transformation Kit plus UV Lamp for £49**

**BIO-RAD**
